Quantitative Finance Division Off-Cycle Internship

Our London office is offering Off-Cycle Internships within the Quantitative Finance Division.

This is an opportunity to explore opportunities in Quantitative Finance by working with desk strategists to become an integral member of the team.

During your internship, you will receive on-the-job training, make strategic decisions, develop quantitative edge, drive efficiencies and effect changes.

Electronic Traders will design, build and measure intelligent automated trading components. Quant Traders will use statistical techniques and learning to optimise trading components and flows. Interns will use mathematical finance to create models that drive trading decisions, create efficiencies and enhance Morgan Stanley's ability to take and manage risk.
